

Introduce responsible AI to create measurable business value, improve selected processes, enable people, and remain governable.

TRANSFORMATION QUESTION

- Which business problems should AI help solve?
- For whom—customer, employee, or management?
- Which process and decision are affected?
- What evidence would justify GO, ADAPT, HOLD, or STOP?

DECISION GATE — APPLY AT EVERY PHASE

- GO — evidence supports only the named next step.
- ADAPT — route remains valid; scope, method, or artifact changes.
- HOLD — owner, evidence, specialist review, or prerequisite is missing.
- STOP — problem, method, or route is not viable within acceptable limits.

NAVIGATE & READ

- Big picture first; zoom for evidence detail.
- HTML: wheel/pinch to zoom; drag to pan; click a phase to inspect.
- Use phase selector or keyboard arrows; 0 resets the canvas.
